David Campbell, R.P. Draper, C. Huffington : A Systemic Approach to Consultation (The Systemic Thinking and Practice Series - Work with Organizations) before purchasing it in order to gage whether or not it would be worth my time, and all praised A Systemic Approach to Consultation (The Systemic Thinking and Practice Series -

Work with Organizations):

A Systemic Approach to Consultation discusses the application of systemic thinking to work within organizations. The authors draw on their experiences of consulting with teams, departments and whole organizations in both the public and private sectors. They describe their work as an integrated approach called Development Consultation, which focuses on the beliefs and behaviors in the wider system which makes it difficult for organizations to manage their own processes of change. The authors then discuss the way they formulate systemic problems and the interventions, particularly the interviewing technique, which they have used in numerous case examples. The book is intended as a handbook for professionals from any discipline who are engaged in consultation work.

A Systemic Approach to Consultation discusses the application of systemic thinking to work within organizations. The authors draw on their experiences of consulting with teams, departments and whole organizations in both the public and private sectors. They describe their work as an integrated approach called Development Consultation, which focuses on the beliefs and behaviors in the wider system which makes it difficult for organizations to manage their own processes of change. The authors then discuss the way they formulate systemic problems and the interventions, particularly the interviewing technique, which they have used in numerous case examples. The book is intended as a handbook for professionals from any discipline who are engaged in consultation work. About the Author David Campbell is a well-established clinical psychologist, who works as a trainer and clinician for the National Health Service at the Tavistock Clinic in London, and also as a freelance consultant to teams and small organizations. For many years he has been interested in developing techniques for working with organizations that incorporate the principles of systemic thinking. His work has led to consulting and training projects throughout the U.K. and Europe for both public and private sector institutions. He has written several articles and books on this subject and is a co-editor of the Systemic Thinking and Practice Series, containing thirty-nine books, which has promoted many new ideas in this field.
