A must read for any business owner or curious at starting a business.

This is a book for anyone. Now, marketing experts would tell you never to say that as you should niche and only focus on a specific target market as not everyone wants everything, but this is the one exception to the rule. That's right; this book is for anyone wanting to make money without doing anything (so long as you are willing to do some work to complete the setup phase). Any single chapter of this book once read and applied can easily make the reader a six-figure income. Apply all chapters and that is already a seven-figure income. Do this multiple times and you can make the transition from millionaire to billionaire quite easily so long as you continue to read and apply. But wait - you say - I don't have a business to market so this won't work for me in my 9-to-5 job. Hold on a tick. Every business sells either a product or service. In my opinion you would be a fool to sell either as a service is constantly exchanging your time for money and a product means you have to constantly reproduce to resupply. In reality, however, to be successful, you need both; you just need to break the traditional rules of supply. That is, you need a product that is produced once and can be sold an infinite number of times combined with a service that you can deliver once to an infinite number of people. If you already have a virtual business you are ready to begin automated marketing straight away. If you currently have a physical business you want to turn virtual or a 9-to-5 job you wish to replace with a passive income make sure you read the prequel to Automated Marketing, which is called Virtual Business (packaged as a free bonus with this book), before you start. If you have an existing business then you can use this book to adapt what you already sell into this perfect monetising marketing system; however, if you don't already have a business in a way you are better off as you can start from scratch (to provide yourself with an ongoing income beyond your wildest dreams so you can leave your 9-to-5 job) rather than reinvent something that already exists. Learn how to become a coach today by moving from working 9-to-5 to getting paid to give others advice as an expert in your field.
