Gill G. Ringland, Oliver Sparrow, Patricia Lustig : Beyond Crisis: Achieving Renewal in a Turbulent World
before purchasing it in order to gauge whether or not it would be worth my time, and all praised Beyond Crisis:
Achieving Renewal in a Turbulent World:

"If you want to know how countries, companies and individuals can master the winds and the waves that will dominate

the next decade, this is the book for you." mdash;Rupert Pennant-Rea, former editor of the Economist, Deputy Governor of the Bank of England "If leading your organisation sometimes feels like changing the front wheel of a bicycle whilst you are still pedalling it as fast as you can, this is a book you should read." mdash;Sir David Brown, former Chairman, Motorola UK "Beyond Crisis is full of compelling reasons, clear advice and practical models to help almost any enterprise remain viable beyond the deeply unsettling systemic failures that characterise today's business environment." mdash;Professor Richard David Hames, Dhurakul University, Founding Director Asian Foresight Institute "We are in uncharted territory. There are few people who any longer think that the world post-crisis will be anything like the world before. Ringland, Sparrow Lusting provide a clear description of the way that leaders need to think in this new reality. In doing so, they give us hope." mdash;Estelle Clark, Business Assurance Director, Lloyds Register The next decade will present organisational challenges on an unprecedented scale. Beyond Crisis shows how you can build a 'purposefully self-renewing organisation' which will survive and succeed in the midst of this chaos. The book shows how financial and economic crisis has blighted organisations in every sector, and then provide a range of tools and future scenarios for diagnosing problems and creating solutions. This is a welcome dose of clarity in uncertain times.
