**J P Das, Sasi B. Misra : Cognitive Planning and Executive Functions: Applications in Management and Education** before purchasing it in order to gage whether or not it would be worth my time, and all praised Cognitive Planning and Executive Functions: Applications in Management and Education:

What lies behind decision-making and improved educational and managerial performance? This book tries to answer by putting forth meaningful strategies in the context of planning and executive functions. This is based on five broad themes:

- Decisions are based on both emotions and rationality in varying proportions.
- Emotions and rationality are functions of the brain.
- Origin of planning and executive functions engaged in problem-solving, and how these functions are measured from three worlds, viz., world of physical objects, world of conscious and unconscious states and psychological control, and world of cultural products, such as language, theories in science, and objects of art.
- Improvement in planning and executive functions helps in better performance in both educational achievements and managerial decision-making.
- Methods to boost decision-making and planning.

This book will interest Educational Planners and Managers in business administration as well as the undergraduate and postgraduate students of Psychology, Management and Education.

Das and Misra demonstrate the value of integrating Western traditions of rational analyses with contemplative Eastern approaches to further the understanding of higher levels of cognitive functioning.--The Journal of Entrepreneurship, "April 20, 2017, March 2016 " Das and Misra demonstrate the value of integrating Western traditions of rational analyses with contemplative Eastern approaches to further the understanding of higher levels of cognitive functioning. (The Journal of Entrepreneurship, April 20, 2017, March 2016)About the AuthorJ.P. Das is an Indo-Canadian psychologist and an internationally recognized expert in Intelligence. Among his major contributions to psychology is the PASS (Planning, Attention, Simultaneous, and Successive) theory of intelligence. He is currently engaged in expanding planning to include executive functions. What might be the implications of these higher mental activities for education as well as management behavior is the topic of this book.Professor Das is an Emeritus Director of the Centre on Developmental Learning Disabilities (named after him) at the University of Alberta, Edmonton, Canada, and Emeritus Professor in Educational Psychology. He has authored and co-authored over a dozen of books and contributed more than 300 research papers to international journals and edited volumes. His earlier published titles with SAGE include Cognitive Planning: The Psychological Basis of Intelligent Behaviour (1996, co-authored with Binod C. Kar and Rauno K. Parrila); The Working Mind (1998); Reading Difficulties and Dyslexia: An Interpretation for Teachers (2009); and Consciousness Quest: East Meets West (2014).
