By Gail Whitman
I had bought Kari's first book (*The Handmade Marketplace*) when it first came out and had been reading it while trying to set up my own greeting card business. Her style of writing is very personal and I felt like she was addressing my concerns with every chapter that I read. Because I am such a novice at all of the business stuff, I needed someone who could explain things on a level that I could understand and would not find dry or boring. Kari Chapin was just what I needed. I was so excited when I saw that she had another book out and ordered it as soon as I saw it. I was not disappointed. This is as good as the first one. The chapter on time management was particularly helpful for me. I have a tendency to procrastinate and am always playing catch-up with orders. This book helped me to organize my day so that I get more done and don't feel so pressured. I cannot wait until she has another book out.

By Lee C. Easy to read and understand. Motivating. It's like talking to a friend who knows what you need to do to start and grow your business. You still need a book about the proper forms, collecting taxes, etc., though. I highlighted the most important sections/pages and passed it along to a friend. I had marked almost all the pages for her to read. Probably didn't need to highlight at all - just say, "here, please read this!") Great book. Glad I got it.
