Great bookBy CustomerSohail has some useful pointers on what to look for in a JV and how to eliminate the wrong type of partners, its a good starting point for sure. I recommend you read it but be aware it isn't telling you step by step on what to do to make this happen and if that is what you are looking for then don't buy it, however I am sure if you reached out to him on LinkedIn and follow him on social media, you could find a lot of value.0 of 0 people found the following review helpful. Narcissistic Author/Awful bookBy JessicaThis has got to be one of the worst books I've ever read on marketing. The entire book is chapter after chapter of the author talking about how great he is, instead of offering valuable advice to those reading it. It was like learning from a sleazy car salesman with Donald Trump's narcissism. I wouldn't waste your time reading this. And I've never left a bad review before this but have to in this case. Plus there were so many typos it was killing me.2 of 2 people found the following review helpful.
