By MeI am thinking about opening a small private preschool on my property but I am concerned with startup costs and if I could actually do it. This book has so far been a wonderful help. While it does not break down every little piece it lets you know where to

find the information you would need as each state is different and rules and regulations are constantly changing. The book also breaks down if you are trying to start a large daycare from scratch, if you are taking over a large daycare, or if you are starting one in your own home. I would highly recommend this book before diving in!!2 of 2 people found the following review helpful. Extremely helpful. A must-have for child care professionals!By Kay HarrisExtremely helpful. Because parents must work outside the home, there will always be a demand for childcare. According to the Bureau of Labor Statistics, in 64 percent of married-couple families, both husband and wife work outside the home. There are nearly 12 million children under the age of five in child care each week in the United States. With concerns about quality child care, the trend is to move away from large operations and turn to the small services located close by work or home. This increase in small day care operations creates a huge opportunity for someone who loves children and wants to create a business dedicated to taking care of them. A child care service makes an ideal home based or part-time business. Start-up costs are low. You do not need an office. You do not need any costly special equipment. All you need to get started is an approved facility and a desire to succeed. Here is the manual you need to be successful in this highly profitable segment of the service industry.
