Max Boisot : Information Space (RLE: Organizations) (Routledge Library Editions: Organizations) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Information Space (RLE: Organizations) (Routledge Library Editions: Organizations):

In this book the author lays the foundations for a new political economy of information. The information space, or I-

Space is the conceptual framework in which organizations, institutions and cultures are being transformed by new information and communication technologies. In the penultimate chapter, the I-Spacers' usefulness as an explanatory framework is illustrated with an application: a case study of China's modernization. Information Space proposes a radical shift in the way that we approach the emerging information age and the implications it holds for societies, organizations and individuals.

'A first class treatise...a milestone in economic thinking' Ervin Laslo, The General Evolution Group
'Boisot is a fine writer, an elegant thinker...This knowledge of culture is indispensable to the design of strategies for institutional change' Laurence E Lynn Jr, University of Chicago
'This is one of those rare path-breaking books which academics or practitioners should not ignore.' John Child, University of Cambridge.
