Sunny's book that I read it in two settings - I bought the book to give to my adult kids to read and hopefully apply the tips that Sunny shares with their kids, but what I got was so much more. I was encouraged by the program that Sunny has used to raise her own "money masters." It's more of a life program not just for kids, but for families. The practical tips on developing discipline and a goal oriented approach to daily living can benefit all of us! I was surprised at the depth of the program that Sunny lays out in her book, but she breaks it down into easy age appropriate steps. So whether your child is two or twelve, it's never too late to create money masters versus money monsters. It will not only benefit kids, it will change the dynamics of your home life and the future of your children and your family. 0 of 0 people found the following review helpful. This is a great book. Really enjoy reading it. By Customer This is a great book. Really enjoy reading it. It was very practical. Definitely recommend this book to others who want to guide and talk to their child(ren) about finance and money matters. Parents and children can learn so much from her methods and things she did with her boys. 1 of 1 people found the following review helpful. Four Stars By Customer This book doesn't align with my political beliefs. But if you are a democrat, I highly recommended it.

DO YOU WANT YOUR CHILD TO BE A MONEY MASTER OR A MONEY MONSTER? Sunny knows the power of rewards, and shows parents how to use that power to encourage their children to thrive. When her twin sons, Jason and Matthew, were born, Sunny developed a successfully proven system that taught them where money comes from, how to save it and earn interest, what hidden costs are involved in purchases, and how saving a little bit every day helps us to reach our goals. And it worked! This book will show you the creative system Sunny used with her boys. And if you, too, are a child at heart, Sunny's system may help you strive a little harder to improve! Plus, she shows you some pretty fun games! A war is being waged against this new generation. So many wrong messages about money and success are influencing our children's young minds. If you don't teach your children about these topics, someone else will...and you may not like the outcome. Money Masters and Money Monsters are created through what they're taught. Which one do you want your children to be?

"A critical issue we face in America is the training for our children to fully develop to become responsible, dependable and happy. Happiness is a byproduct of how we operate and who we are. I certainly will share this book with my children so they can help their children because I believe it will help the whole person in addition to helping him become financially secure. I know that many people will not make the effort it will take to teach these truths to their children, but those who do will be richly rewarded." William H. Cain, CEO/Financial Independence Group
