Nabyla Daidj : Strategy, Structure and Corporate Governance: Expressing inter-firm networks and group-affiliated companies (Finance, Governance and Sustainability) before purchasing it in order to gage whether or not it would be worth my time, and all praised Strategy, Structure and Corporate Governance: Expressing inter-firm

networks and group-affiliated companies (Finance, Governance and Sustainability):

Since the beginning of the 2000s, important changes in external environments have affected the corporate governance practices of firms all around the world. The corporate governance structure in each country develops in response to country-specific factors and conditions. Firms are currently engaged in a variety of dynamic business relationships such as business networks, strategic alliances, and conglomerates especially in high technology sectors. *Strategy, Structure and Corporate Governance* by Nabyla Daidj, proposes to analyze the main trends and drivers of change in corporate governance of several kinds of organizations: - Large conglomerates. The development of large and complex conglomerate organizations have played an important role in the economy in Japan but also in other countries such as Korea with chaebols, which can be defined as closely intertwined industrial groupings. - Inter-firms networks (districts, clusters etc.); and, - 'Recent' forms of inter-firms networks (business ecosystems). The author examines several case studies and shows how shifts in markets and global competition are reconfiguring transactions within these organizations and are impacting corporate governance systems.

About the Author Nabyla Daidj is Associate Professor of Strategic Management at the Teacut;leacute;com Ecole de Management in France. She received her doctorate in Economics from the Pantheon-Sorbonne University in Paris in 1994, with a thesis on strategic alliances in high-tech industries.
