From Springer : Supply Chain Design and Management for Emerging Markets: Learning from Countries and Regions before purchasing it in order to gage whether or not it would be worth my time, and all praised Supply Chain Design and Management for Emerging Markets: Learning from Countries and Regions:

This book focuses on supply chain management in emerging markets. The authors present issues relating to supply chain development covering countries such as Brazil, China, the Czech Republic, Russia, Indonesia, Malaysia, Nepal, Turkey, Egypt and South Africa and focuses on the challenges faced when the supply chain is designed and maintained. Such challenges derive from issues to do with risk, security, quality management and infrastructure among others. Case studies and survey results are presented in chapters which explore practical solutions to these issues. The latter will be of interest not only to local and international managers, but also to students who are interested in emerging economies. The book covers manufacturing, retail and food chains at the local and international levels.

From the Back Cover This book focuses on supply chain management in emerging markets. The authors present issues relating to supply chain development covering countries such as Brazil, China, the Czech Republic, Russia, Indonesia, Malaysia, Nepal, Turkey, Egypt and South Africa, and focuses on the challenges faced when the supply chain is designed and maintained. Such challenges derive from issues to do with risk, security, quality management and, infrastructure among others. Case studies and survey results are presented in chapters which explore practical solutions to these issues. The latter will be of interest not only to local and international managers, but also to students who are interested in emerging economies. The book covers manufacturing, retail and food chains at the local and international levels.

About the Author Dr Wojciech Piotrowicz is a member of the Faculty of Management, University of Oxford at Saïd Business School and Wolfson College. He has a PhD from Brunel University, a Masters Degree in Economics from the University of Gdask and a Post-Graduate diploma in Learning and Teaching in Higher Education (University of Oxford). His research is related to supply chain management, information systems, IT/BP outsourcing, performance measurement and evaluation, with a focus on retail and emerging markets. At Oxford University he teaches Technology and Operations Management and supervises EEM and MBA projects. Wojciech has considerable experience of large international research projects within both the public and private sectors, working with organisations such as Intel, BAE Systems, the European Commission and the Polish government. He is a recipient of 'Outstanding and Highly Commended' paper awards from the Emerald Literati Network for Excellence.

Dr Richard Cuthbertson is a Senior Research Fellow at the Saïd Business School, University of Oxford, UK. He focuses on developing effective value chains through the strategic use of information, performance measurement and benchmarking. He has worked with leading European and international companies. He was a member of the Global Commerce Initiative Scorecard committee, aimed at introducing standards in supply chain processes and information exchange for the global consumer goods industry, and works with other trade and government organisations.
