should occur during different weeks, there isn't a program per se. Also, the writing is horridly cliché; to the point that it reads like a mess of old adages strung together. It's a bummer Wiley Sons couldn't have actually provided an editor on this book. 0 of 1 people found the following review helpful. Nice and precise By theopolis ivory I thought this book had some good points, and things to consider when conducting business. The only downfall it has to me is that it could go more into detail about seducing different personality types otherwise It would have been five stars, but It is worth purchasing for sure. 0 of 1 people found the following review helpful. Enjoyable and Valuable By Amit Keynan Easy reading, provide simple, but powerful techniques that can easily be able to implemented and remember. I have seen also his presentation and the combination of both is really powerful !
