**Bob Doppelt : The Power of Sustainable Thinking: quote;How to Create a Positive Future for the Climate, the Planet, Your Organization and Your Lifequote;** before purchasing it in order to gage whether or not it would be

worth my time, and all praised *The Power of Sustainable Thinking: How to Create a Positive Future for the Climate, the Planet, Your Organization and Your Life*:

1 of 1 people found the following review helpful. More text than prose. Well written, but heavy on facts. Would be a good read for someone looking to change how their business operates or trying to make organizational changes geared toward sustainability.

The future will be powered by sustainable thinking in business, organizations, governments and everyday life. This revolutionary book tackles climate change, sustainability and life success by starting with your mind. It provides proven 'staged-based' methods for transforming thinking and behaviour, beginning first with the reader's own cognitive patterns, then moving to how individuals can motivate other people to change, and finally to how teams and organizations can be motivated to change.

'A valuable guide book for those courageous enough to transform their traditional cognitive biases towards more sustainable behaviour.' Dr. Steve Schneider, IPCC member and lead author, Stanford University 'An empowering, just-in-time, practical guide for mobilized sustainability change agents.' Bob Willard, author of *The Sustainability Advantage* and *The Next Sustainability Wave* 'This book will make you think. Hard. And systemically.' Nick Pudar, vice president, Planning and Business Development, OnStar Corporation 'Every corner of society is beginning to take on this biggest of all problems - here's a very useful way of understanding how the process might be accelerated.' Bill McKibben, author of *The End of Nature* and *The Bill McKibben Reader* 'Here, at last, is a book for all of us who have been frustrated by our inability to mobilize significant change around the issue of global warming.' Denis Hayes, national coordinator of the first Earth Day, president and CEO, Bullitt Foundation 'This is not just another book on sustainability; it is far more important than that.' Julian Agyeman, associate professor and chair, Department of Urban and Environmental Policy and Planning, Tufts University, and lead author of *Just Sustainability* '(This) well-designed book contains a cornucopia of insights and techniques for decision-making, strategizing, motivating and achieving change on local and national scales...Highly recommended.' *Choice Magazine* 'successfully delivering a practical and inspiring vision for change that is applicable in many life situations.' Martin Sahlen, SGR newsletter 'In the Evangelical community, the need is not just to change what we think but how we think. Thus the book that has helped me the most to move otherwise unmovable people is Bob Doppelt's *The Power of Sustainable Thinking*. As Jesus said, As a man [or woman] thinketh, so he [she] is.' Richard Cizik, Audubon. 'The well-designed book contains a cornucopia of insights and techniques for decision making, strategizing, motivating, and achieving change on local and national scales.' F.T. Manheim, *Choice*, June 2010. About the Author Bob Doppelt is director of Resource Innovations and The Climate Leadership Initiative in the Institute for a Sustainable Environment, and Adjunct associate professor in the Department of Planning, Public Policy, and Management at the University of Oregon, USA.
